## # Agriculture Loan Eligibility Checker

The \*\*Agriculture Loan Eligibility Checker\*\* is an interactive Python program that helps determine whether a farmer is eligible for an agriculture loan based on age, income, land area, supported crop type, and loan history.

### ## Features

- Collects farmer information through user prompts.
- Checks eligibility for:
  - Age (18–70 years)
  - Annual income (at least ₹60,000)
  - Minimum land area (1 acre)
  - No existing loan
  - Supported crop type
- Provides instant approval/denial status with reason.

### ## Supported Crops

- Rice
- Brinjal
- Peas
- Groundnuts
- Wheat
- Maize
- Sugarcane

### ## Prerequisites

- Python 3.6 or higher
- No extra libraries required

## ## How to Run

1. Save the script as `agri\_loan\_checker.py`.
2. Open a terminal or command prompt.
3. Run:
4. Provide the requested information when prompted.

## ## Customization

- Add/remove crops by editing `supported\_crops` list.
- Adjust eligibility logic as needed.

## ## Sample Output
